EDUCATION

B.TECH(Electronics and Communication Engineering)	2023-2027	Delhi Technological University, New Delhi	8.31
JKBOSE (Class XII)	2023	Dogra Higher Secondary School, Jammu, J&K	95.8 %
JKBOSE (Class X)	2021	S.D. Tara Puri Public High School, Jammu, J&K	87 %

INTERNSHIPS

Hibiscustech GR Private Limited July 2025-Present
Full-Stack Developer Intern Remote

- Owned **end-to-end development** of web features using **Next.js frontend and Go-based REST APIs**, from design to deployment.
- Designed **normalized PostgreSQL schemas** and optimized queries using indexing and query refactoring, improving API response latency and reliability.
- Implemented **backend algorithms in Go** for core workflows, focusing on correctness, edge-case handling, and maintainable abstractions.
- Built **CI/CD pipelines using GitHub Actions**, enabling automated testing and consistent deployments.
- Debugged production issues, participated in **code reviews**, and delivered features in **agile sprint cycles**.

ACADEMIC PROJECT

Noesis – Modular AI Research Agent 2025
Backend Systems, AI Orchestration **GITHUB | Link |**

- Architected a **modular backend system** to orchestrate multiple AI agents responsible for retrieval, reasoning, and synthesis.
- Designed **REST APIs and WebSocket-based real-time pipelines** to stream intermediate and final agent outputs.
- Implemented **semantic search using PostgreSQL (pgvector)** and modeled relationships via **Neo4j knowledge graphs**.
- Introduced caching and optimized data flow to improve **latency, scalability, and fault tolerance**.
- Emphasized **clean system design**, separation of concerns, and extensibility.

JobForge-AI – Intelligent Job Application Automation 2025
Backend APIs, AI Pipelines **GITHUB | Link**

- Built **backend services** to parse unstructured job descriptions and extract required skills and role expectations.
- Designed **multi-stage API pipelines** for parsing, scoring, and generating structured AI-assisted outputs.
- Implemented **workflow orchestration logic** to ensure reliable execution across dependent stages.
- Added **robust error handling and validation** to handle malformed inputs and external API failures.
- Designed the system to be **modular and extensible** across multiple job platforms.

TECHNICAL SKILLS

C, C++,Go,Python, JavaScript	React.js, Next.js, HTML, CSS, Tailwind CSS, TypeScript	REST APIs, FastAPI, Node.js, PostgreSQL, CI/CD	Data Structures & Algorithms, OOP

OTHER INFORMATION

- Solved **300+** DSA problems across arrays, strings, hashing, trees, graphs, recursion, and dynamic programming (LeetCode).
